² Except in Washington and North Carolina, the acceleration of the death benefit is intended to receive favorable tax treatment under §101(g) of the Internal Revenue Code. Accessing other similar benefits may cause the per diem limit to be exceeded. The insured must be chronically ill or terminally ill, as defined in 26 USC 7702B. Certificate owners should seek advice from a tax advisor prior to requesting a benefit payment. Receipt of accelerated death benefits may be taxable. For group policies issued in Washington or North Carolina, the Chronic Care Benefit defines a chronic illness in accordance with state insurance requirements, and may be taxable, as the state prescribed definition differs from the federal tax law definition.

Accelerating the payment of your death benefit may affect eligibility for public assistance programs, including MEDICAID and SUPPLEMENTAL SECURITY INCOME ("SSI"). Insureds should contact the Medicaid Unit of the local Department of Public Welfare and the Social Security Administration Office for more information.

An acceleration of the death benefit will reduce the certificate's death benefit, any cash value and any loan values. The certificate's premium payments will be based on the reduced amount of insurance at the current rate. There is no premium required for either the chronic care or terminal illness benefits, however, there is a fee if the chronic care benefit provision is exercised. The fee for the Chronic Care Benefit is a present value adjustment shown as a percentage of the Eligible Amount for the Chronic Care Benefit. The percentage depends on the Insured's age at the time the benefit is exercised: 18% for ages 45 and above; 27% for ages 44-35; 36% for under age 35. In the situs states of Kansas, Minnesota, North Carolina and Washington the term "fee" is replaced with "Actuarial Discount." For Montana, "fee" is replaced with "Reduction."

Please carefully read the accelerated death benefit disclosure provided at application. Restrictions and limitations will apply.
